WORK HISTORY

CAPTIAN & FLEET MANAGEMENT

[Redacted]

February 2015 - December 2020

- Checking food and drink inventory (for myself and the fleet) and deciding how much should be sold in a given day, then load that amount onto each vessels bar. I then launch the boat by myself from the marina and drive it to Crab Island where I approach tourist or captain operated boats.
- I then solo tie up to customers boats and bartend/serve food.
- At the end of the day I drive my boat back to the marina and solo dock myself. I unload the garbage and clean the boat and all of the tools used that day.
